Data Sheet

VCI-2000 Powder Pack #3 (Vapor Corrosion Inhibitor)

Product Description

Each **VCI-2000 Powder Pack#3** contains a Vapor Corrosion Inhibitor (VCI) powder which protects ferrous and non-ferrous metals against corrosion, oxidation, tarnish and discoloration. Provides an extremely efficient method for the dry preservation of metal parts within an enclosed space. The VCI vaporizes and then adsorbs on all metal surfaces, reaching even the most difficult to reach recesses and interior voids.

Corrosion Protection

Protects up to 1.0 cubic foot (28 liters) for up to 24 months.

Application

VCI-2000 Powder Pack#3 is designed to protect metals inside an enclosed container such as a cardboard box, crate, plastic or metal bin, poly bag or envelope. Do not open the **Powder Pack**. Simply place the pouch in the container with the parts to be protected and close the container.
